INFRASTRUCTURE

EARLY WORKS

Infrastructure Early Works

Project Overview

Ezyquip was engaged by Rolleston Coal to support the C2418 Early Works package for the Rolleston West Infrastructure Project. The project required a reliable wet hire partner capable of delivering modified plant, experienced operators, and responsive project support within strict timeframes.

Drawing on our extensive experience supporting mining and civil projects across regional and remote Australia, Ezyquip provided a tailored solution that combined high-performance equipment with skilled operators to help prepare critical infrastructure for future site expansion.

The Challenge

The project presented several operational challenges, including tight deadlines for plant modifications, the mobilisation of qualified operators, and maintaining continuity across a remote worksite.

In addition, daily billing accuracy and resource planning required close coordination between Ezyquip and the client to ensure transparency and effective project delivery.

The Ezyquip Solution

Rolleston,
Queensland

Location

Project Support

Equipment

Ezyquip worked closely with the Rolleston Coal project team throughout the project, conducting regular site visits and weekly stakeholder meetings to maintain strong communication and alignment. By developing trusted relationships on site and remaining responsive to changing requirements, we were able to proactively resolve issues, support project objectives, and ensure works progressed without impacting critical schedules.

Equipment Supplied:

- CAT 637K Scrapers Qty. 4
- CAT 14M Grader Qty. 1
- CAT D8T Dozers Qty. 2
- Service Truck Qty. 1
- Water Truck Qty. 1
- Fitters Qty. 1

This fleet enabled efficient bulk earthworks, grading, site preparation, and ongoing maintenance support throughout the project.

Our Team:

- Delivered all required plant modifications within the allocated timeframes.
- Coordinated operator mobilisation, including travel and site inductions.
- Implemented daily billing communication and weekly reconciliation meetings.
- Leveraged resources from multiple branch locations to maintain workforce continuity.
- Maintained open communication channels to quickly respond to changing site requirements.

The Results:

- Delivered all modified equipment on schedule.
- Maintained consistent operator coverage throughout the project.
- Established a transparent and reliable billing process.
- Responded rapidly to changing project requirements.
- Strengthened our partnership with Rolleston Coal through dependable service and communication.

Why Ezyquip?

Projects like Rolleston West Infrastructure demonstrate Ezyquip's ability to rapidly mobilise equipment and personnel while maintaining the flexibility required by large-scale mining and civil projects.

Our combination of quality equipment, experienced operators, and customer-focused project support enables clients to meet demanding schedules with confidence.

Whether supporting mining operations, civil construction, infrastructure development, renewable energy projects, pipelines, or remote works, Ezyquip delivers practical solutions that keep projects moving.
